# CONTENTS OF VOL. 79 Nos 1–12

## NUMBER 1—JANUARY

**Activation volume for the creep of a superplastic Pb–Sn alloy evaluated by dynamic internal friction**
P. Zhang and Q. P. Kong ..... 1

**Atomic structure of the austenite–cementite interface of proeutectoid cementite plates**
J. M. Howe and G. Spanos ..... 9

**Elastic constants of $Ti_{50}Ni_{30}Cu_{20}$ alloy prior to martensitic transformation**
X. Ren, K. Taniwaki, K. Otsuka, T. Suzuki, K. Tanaka, Yu. I. Chumlyakov and T. Ueki ..... 31

**The self-excited wave model of plastic deformation in solids**
L. B. Zuev and V. I. Danilov ..... 43

**Methods of analysis and measurement of irradiation creep in non-cubic metals**
C. H. Woo, A. R. Causey and R. A. Holt ..... 59

**Atomic observations at the reactive wetting front on SiC**
C. Iwamoto, H. Ichinose and S.-I. Tanaka ..... 85

**Correlation of amorphization effects in titanium solid solutions via mechanical milling and annealing**
D. Li, K. J. Doherty, S. J. Poon and G. J. Shiflet ..... 97

**Transmission electron microscopy of cross-sections of magnetoresistive read heads**
N. Wang, K. K. Fung, X. F. Zhang, J. B. Geng, P. K. Wang and S. T. Lee ..... 107

**A model for the initiation of dynamic recrystallization in two-phase materials**
A. Manonukul and F. P. E. Dunne ..... 113

**Ion-induced spike effects on metal surfaces**
S. E. Donnelly and R. C. Birtcher ..... 133

**Study of the irradiation-induced $\alpha \rightarrow \omega$ phase transformation in titanium: kinetics and mechanism**
H. Dammak, A. Dunlop and D. Lesueur ..... 147

**Mechanical properties of crazes investigated by ultramicrohardness**
G. H. Michler, M. Ensslen, F. J. Baltá-Calleja, L. Könczöl and W. Döll ..... 167

**The structure, thickness and chemistry of antiphase domain boundaries in heat-treated, rapidly solidified $Ni_3Al$**
J. F. Perez, P. Shang, D. G. Morris and I. P. Jones ..... 179

**Limits of the tracer diffusion coefficient ratio in highly ordered alloys and intermetallic compounds taking the B2 structure**
I. V. Belova and G. E. Murch ..... 193

**Mesoscale simulations of particle pinning**
M. Miodownik, J. W. Martin and A. Cerezo ..... 203

**The glass transition in a model silica glass: evolution of the local structure**
P. Jund and R. Jullien ..... 223

**Transmission electron microscopy study of ion-beam-induced amorphization of $Ca_2La_8(SiO_4)_6O_2$**
L. M. Wang and W. J. Weber ..... 237

NUMBER 2—FEBRUARY

**Superlattice ordering of cubic symmetry in an icosahedral Al–Pd–Mn phase**
M. Audier, M. Duneau, M. de Boissieu, M. Boudard and A. Letoublon ..... 255

**Prediction of crack statistics in a random polycrystal damaged by the pile-ups of extrinsic grain-boundary dislocations**
M. S. Wu and M. D. He ..... 271

**Dislocation pinning in a low-dose neutron irradiated Al–Mg–Si industrial alloy**
E. Carreño-Morelli, A. A. Ghilarducci and S. E. Urreta ..... 293

**Grain-boundary plane reorientation in copper**
V. Randle, P. Davies and B. Hulm ..... 305

**Dislocation migration and phason strain relaxation in a quasicrystal**
S. Takeuchi, K. Shinoda and K. Edagawa ..... 317

**Conditions for superplastic deformation**
A. I. Pshenichnyuk, O. A. Kaibyshev and V. V. Astanin ..... 329

**Interpretation of creep curves of double-notch copper single crystal specimens**
A. Orlová and K. Kuchařová ..... 339

**Atomistic models of dislocation formation at crystal surface ledges in $Si_{1-x}Ge_x$/Si(100) heteroepitaxial thin films**
H. Gao, C. S. Ozkan, W. D. Nix, J. A. Zimmerman and L. B. Freund ..... 349

**A modified Voigt method for calculation of the elastic constants of ensembles selected by diffraction methods**
C. E. Murray and I. C. Noyan ..... 371

**Structural effects in ion-beam-modified polymers**
E. G. Gerstner, D. G. McCulloch, D. R. McKenzie and E. Yap ..... 391

**Planar debris in plastically deformed Al-rich γ-TiAl**
F. Grégori and P. Veyssière ..... 403

**Precipitation and growth of the metastable phase γ′ in Al–1 at.% Ag under cyclic deformation at elevated temperatures**
H. Voss, G. Schmitz and F. Haider ..... 423

**Nuclear magnetic resonance studies on $Cu_3Au$, CuAu and $CuAu_3$ alloys**
T. Shinohara, S. Saitoh, F. Wagatuma and S. Yamaguchi ..... 437

**Hydrogen and water intercalation into $YBa_2Cu_3O_{7-\delta}$: structural properties of $H_2YBa_2Cu_3O_{8-\delta}$**
W. Günther, R. Schöllhorn, M. Epple, H. Siegle, Ch. Thomsen, B. Kabius, U. Poppe, J. Schubert and W. Zander ..... 449

**Dynamical expansion of a dislocation loop on a two-dimensional periodic potential**
H. Koizumi, K. Ohno, T. Suzuki and F. R. N. Nabarro ..... 467

**Hardness enhancement and elastic modulus behaviour in sputtered Ag/Ni multilayers with different modulation wavelengths**
H. Geisler, K. O. Schweitz, J. Chevallier, J. Bøttiger and K. Samwer ..... 485

NUMBER 3—MARCH

**Chemical-twinning mode of the B2 structure in relation to Al–Cu approximants**
C. Dong, Q. Zhang, D. Wang and Y. Wang ..... 501

**Imperfect dislocations at non-basal plane defects in 18R and 2H martensites: transmission electron microscopy studies**
A. M. Condó and F. C. Lovey ..... 511

**Atomistic simulation of screw dislocations in rock salt structured materials**
G. W. Watson, E. T. Kelsey and S. C. Parker ..... 527

**Catastrophic nucleation during decomposition of Cu–0.9at.% Ti**
C. Borchers ..... 537

**Determination of the tiling type and phason strain analysis of decagonal quasicrystals in Al–Ni–Co alloys**
R. Hory, C. Pohla and P. L. Ryder ..... 549

**Spontaneous twin formation in ZnSe films grown by molecular beam epitaxy**
S. B. Sant, G. C. Weatherly and R. W. Smith ..... 561

**The effect of tip momentum on the contact stiffness and yielding during nanoindentation testing**
A. B. Mann and J. B. Pethica ..... 577

**An investigation of growth-induced defects in crystals of potassium hydrogen phthalate**
G. R. Ester and P. J. Halfpenny ..... 593

**Yield stress anomalies in single crystals of Ti–54.5 at.% Al II. $\frac{1}{2}[\bar{1}12](1\bar{1}\bar{1})$ slip**
S. Jiao, N. Bird, P. B. Hirsch and G. Taylor ..... 609

***In-situ* atomic force microscopy and transmission electron microscopy observations of the deformation of MC2 nickel-based superalloy $\gamma$ phase**
C. Coupeau, S. Brochard, M. Jouiad, A. Coujou and J. Grilhé ..... 627

**Twin formation and morphology of vapour grown silver halide crystals**
G. Bögels, H. Meekes, P. Bennema and D. Bollen ..... 639

**$\langle 331 \rangle$ slip on {013} planes in molybdenum disilicide**
U. V. Waghmare, V. Bulatov, E. Kaxiras and M. S. Duesbery ..... 655

**Effect of extrinsic grain-boundary defects on grain-boundary sliding resistance**
R. J. Kurtz, R. G. Hoagland and J. P. Hirth ..... 665

**Computer simulation of extrinsic grain-boundary defects in the $\Sigma 11$, $\langle 101 \rangle \{131\}$ symmetric tilt boundary**
R. J. Kurtz, R. G. Hoagland and J. P. Hirth ..... 683

**Computer modelling of slip in TiC**
R. M. Harris and P. D. Bristowe ..... 705

***In-situ* straining experiments in NiAl along soft orientations, and comparison with atomistic simulations**
D. Caillard, C. Vailhé and D. Farkas ..... 723

**Cyclic deformation behaviour of a copper bicrystal with single-slip-oriented component crystals and a perpendicular grain boundary: cyclic stress–strain response and saturation dislocation observation**
Z. F. Zhang and Z. G. Wang ..... 741

**Inter-sublattice ordering correlations and the geometrical locus approach to localized diffuse scattering**
R. L. Withers, Th. Proffen and T. R. Welberry ..... 753

NUMBER 4—APRIL

**Grain growth of thin films conforming to a curved surface**
M. A. Palmer, M. E. Glicksman and K. Rajan ..... 763

**Collective effects in the adatom production by 4.5 keV rare-gas impacts on Pt(111): a low-temperature scanning tunnelling microscopy analysis**
M. Morgenstern, T. Michely and G. Comsa ..... 775

**Molecular dynamics investigations of surface damage produced by kiloelectronvolt self-bombardment of solids**
M. Ghaly, K. Nordlund and R. S. Averback ..... 795

**Atomic disordering in $YB_{56}$ detected by high-resolution electron microscopy with residual indices**
T. Oku and J.-O. Bovin ..... 821

**Detection of residual stresses in glass-penetrated polycrystalline alumina with nanoindentation**
A. V. Zagrebelny and C. B. Carter ..... 835

**Crystallographic structure of lead hafnate ($PbHfO_3$) from neutron powder diffraction and electron microscopy**
V. Madigou, J. L. Baudour, F. Bouree, Cl. Favotto, M. Roubin and G. Nihoul ..... 847

**Coarsening of the $\delta'$ phase in aluminium–lithium alloys**
B. Noble and S. E. Bray ..... 859

**The interfaces in $YBa_2Cu_3O_7/BaTbO_3$ and $PrBa_2Cu_3O_7/BaTbO_3$ heterostructure thin films**
C. L. Jia, R. Hojczyk, M. Faley, U. Poppe and K. Urban ..... 873

**A discrete dislocation analysis of residual stresses in a composite material**
H. H. M. Cleveringa, E. Van der Giessen and A. Needleman ..... 893

**Transition from dislocation core spreading to dislocation dissociation in a series of B2 compounds**
C. Vailhé and D. Farkas ..... 921

**The decagonal superstructure $Al_{71}Co_{13}Ni_{16}$ and its relation to the basic decagonal phase $Al_{71}Co_7Ni_{22}$**
T. Haibach, A. Cervellino, M. A. Estermann and W. Steurer ..... 933

**On the origin of the anelastic relaxation effect in $Ni_3Al$**
H. Numakura, N. Kurita, M. Koiwa and P. Gadaud ..... 943

**The theory of dislocation-based crystal plasticity**
D. Kuhlmann-Wilsdorf ..... 955

NUMBER 5—MAY

**High-resolution electron microscopy and molecular dynamics study of the $(a/2)[111]$ screw dislocation in molybdenum**
W. Sigle ..... 1009

**First direct evidence of size-dependent structural transition in nanosized nickel particles**
S. Illy, O. Tillement, F. Machizaud, J. M. Dubois, F. Massicot, Y. Fort and J. Ghanbaja ..... 1021

**Nanoscopic crystallography of chalcopyrite $CuInS_2$ by techniques of convergent-beam electron diffraction**
M. Leicht, D. Stenkamp, H. P. Strunk, D. Wolf, B. Eisner and G. Müller ..... 1033

**Dislocation processes during the plastic deformation of γ-TiAl**
D. Häussler, M. Bartsch, M. Aindow, I. P. Jones and U. Messerschmidt ..... 1045

**Dislocation structure in a Ti–45 at.% Al–10 at.% Nb alloy deformed at room temperature**
W. J. Zhang, Z. C. Liu, G. L. Chen and Y.-W. Kim ..... 1073

**Determination of high-angle grain-boundary misorientations in melt-textured Y–Ba–Cu–O using transmission electron microscopy studies of intragrain structure**
M. Mironova, G. Du, S. Sathyamurthy and K. Salama ..... 1079

**Crystallization behaviour and nanocrystalline microstructure evolution of a $Zr_{57}Cu_{20}Al_{10}Ni_8Ti_5$ bulk amorphous alloy**
L. Q. Xing, J. Eckert, W. Löser, L. Schultz and D. M. Herlach ..... 1095

**A new probe of bonding states in intermetallic compounds**
J. E. Castle, S. J. Greaves, M. R. Guascito and A. M. Salvi ..... 1109

**Computer simulation of grain growth in dual-phase structures**
I. Ohnuma, K. Ishida and T. Nishizawa ..... 1131

**Lattice parameters, density and thermal expansion of InN microcrystals grown by the reaction of nitrogen plasma with liquid indium**
W. Paszkowicz, J. Adamczyk, S. Krukowski, M. Leszczyński, S. Porowski, J. A. Sokołowski, M. Michalec and W. Łasocha ..... 1145

**High-resolution transmission electron microscopy study of a cross-linked fullerene-related multilayer graphitic material**
L. N. Bourgeois and L. A. Bursill ..... 1155

**Atomistic simulation of cross-slip processes in model fcc structures**
S. Rao, T. A. Parthasarathy and C. Woodward ..... 1167

**A microstructural model for predicting hardness profiles of Fe–Cr alloys after nitriding**
J. J. Braam and S. van der Zwaag ..... 1193

**The dissociation energy of extended dislocations in fcc lattices**
G. Schoeck ..... 1207

**A stochastic model of grain size distribution during dynamic recrystallization**
I. Shimizu ..... 1217

**Interionic potential model for the Al–Li system**
A. G. Mikhin and N. de Diego ..... 1233

**Correlation between microstructure evolution and cavity stringer formation in the superplastic Zn–22 wt% Al alloy**
A. Yousefiani and F. A. Mohamed ..... 1247

NUMBER 6—JUNE

**Structure and composition of ternary carbides in carbon-fibre reinforced Mg–Al alloys**
A. Feldhoff, E. Pippel and J. Woltersdorf....1263

**Electron microscopy investigation of ternary γ-brass-type precipitation in a $Ni_{39.6}Mn_{47.5}Ti_{12.9}$ alloy**
J.-W. Seo, D. Schryvers, W. Vermeulen, O. Richard and P. Potapov....1279

**The local atomic environment of Cu and Ni in Fe–Cu–Ni alloys following thermal ageing and neutron irradiation: a study using fluorescence mode X-ray absorption fine-structure spectroscopy**
A. B. Edwards, K. J. Roberts, S. Pizzini and W. J. Phythian....1295

**Molecular dynamics study on the structural changes of the tilt grain boundary in aluminium**
W. Fan, Y. He and X. G. Gong....1321

**The determination of an unknown oxygen atom position in rare-earth zirconate pyrochlores by a 111 systematic-row convergent-beam electron diffraction technique**
Y. Tabira and R. L. Withers....1335

**A quantitative study by transmission electron microscopy of nanoscale precipitates in Al–Mg–Si alloys**
P. Donnadieu, M. Roux-Michollet and V. Chastagnier....1347

**Effect of finite crack length and blunting on dislocation nucleation in mode III**
G. E. Beltz and L. L. Fischer....1367

**Explicit method for calculating the effective properties and micromechanical stresses: an application to an alumina–SiC composite**
P. A. Turner, J. W. Signorelli, M. A. Bertinetti and R. E. Bolmaro....1379

**Analysis of ultrathin Ge layers in Si by large angle convergent beam electron diffraction**
A. Hovsepian, D. Cherns and W. Jaeger....1395

**Incommensuration and other structural anomalies in rhenium disilicide**
A. Misra, F. Chu and T. E. Mitchell....1411

**High-resolution quantitative X-ray microanalysis of Nb/Al multilayer thin films using the ζ-factor approach**
G. Lucadamo, M. Watanabe, K. Barmak, D. B. Williams, C. Michaelsen and R. Alani....1423

**An analysis of unusual cleavage patterns in the stress corrosion fracture of α-brass**
A. J. Forty....1443

**A study of the domain structure of epitaxial $La_{1-x}Ca_xMnO_3$ films by high-resolution transmission electron microscopy**
O. I. Lebedev, G. Van Tendeloo, A. M. Abakumov, S. Amelinckx, B. Leibold and H.-U. Habermeier ..... 1461

**On the role of interphase strain in solid–solid phase transformations: ice clathrates and hexagonal ice**
G. P. Johari ..... 1479

**The migration of phosphorus in ferritic iron alloys under irradiation**
A. B. Lidiard ..... 1493

**Erratum: Dynamic transmission electron microscopy of the [1,6-di(*N*-carbazolyl)-2,4-hexadiyne] diacetylene monomer–polymer phase transformation**
Jun Liao and D. C. Martin ..... 1507

NUMBER 7—JULY

**Diffusion kinetics for migration by bound vacancy pairs in ionic crystals**
I. V. Belova and G. E. Murch ..... 1509

**Sol–gel fabrication of heteroepitaxial zirconia films on MgO(001) substrates**
R. Guinebretière, A. Dauger, O. Masson and B. Soulestin ..... 1517

**High work-hardening rate and deformation twinning of Co–Ni-based superalloy at elevated temperatures**
A. Chiba, X. G. Li and M. S. Kim ..... 1533

**Evolution of substructures in deformed NiAl single crystals oriented for single slip**
X. Shi, S. Mahajan, T. M. Pollock and V. S. Arunachalam ..... 1555

**Special grain boundaries in zirconia corrosion films**
V. Y. Gertsman, Y. P. Lin, A. P. Zhilyaev and J. A. Szpunar ..... 1567

**Like-metal superplasticity of fine-grained $Y_2O_3$-stabilized zirconia ceramics**
M. Jiménez-Melendo and A. Domínguez-Rodríguez ..... 1591

**Simulation of the plastic flow in $Ni_3Al$: work hardening and strain-rate sensitivity**
B. Devincre, P. Veyssière and G. Saada ..... 1609

**Plastic homology of bcc metals**
T. Suzuki, Y. Kamimura and H. O. K. Kirchner ..... 1629

**Structural evolution and isothermal mechanical spectroscopy analysis of a Cu–Al–Ni alloy**
V. Pelosin and A. Rivière ..... 1643

**Mechanism and crystallography of ferrite precipitation from cementite in an Fe–Cr–C alloy during austenitization**
D. V. Shtansky, K. Nakai and Y. Ohmori ..... 1655

**Study of the mechanical properties of Mg–7.7at.% Al by *in-situ* neutron diffraction**
M. A. Gharghouri, G. C. Weatherly, J. D. Embury and J. Root ..... 1671

**A new model for dislocation kink-pair activation at low temperatures based on the Peierls–Nabarro concept**
A. H. W. Ngan ..... 1697

**Phase transformations in the Fe–N system induced by the concomitant use of ion irradiation and temperature**
E. C. Moreira, L. Amaral and M. Behar ..... 1721

**Investigation of carbon aggregates (onions) formed on copper under the conditions of diamond chemical vapour deposition**
F. Le Normand, L. Constant, G. Ehret, M. Romeo, A. Charai, W. Saikaly and C. Speisser ..... 1739

NUMBER 8—AUGUST

**On the range of validity of the continuum approach for nonlinear diffusional mixing of multilayers**
Z. Erdélyi, D. L. Beke, P. Nemes and G. A. Langer ..... 1757

**Comparison of X-ray analysis methods used to determine the grain size and strain in nanocrystalline materials**
H. H. Tian and M. Atzmon ..... 1769

**A new orthorhombic approximant of the Ga–Mn and Ga–Fe–Cu–Si decagonal quasicrystals consisting entirely of uniformly oriented 'crown' subunits**
J. S. Wu, S. P. Ge and K. H. Kuo ..... 1787

**Evaluation of the extrinsic and intrinsic stacking-fault energies of GaP**
D. Cohen and C. B. Carter ..... 1805

**Nucleation of nanocracks by a quasicleavage process in a dislocation-free zone**
S. X. Mao and X.-P. Li ..... 1817

**On the influence of heat treatments in a reducing atmosphere on the mechanical behaviour of yttria fully stabilized zirconia single crystals**
D. Gómez-García, J. Martínez-Fernández, A. Domínguez-Rodríguez and K. H. Westmacott ..... 1839

**Properties of peripheric cells in cellular structures**
M. A. Fortes, M. E. Rosa and S. Findlay ..... 1853

**Coarsening of two-dimensional foams confined by walls**
M. E. Rosa and M. A. Fortes ..... 1871

**Local atomic arrangements in polytetrahedral materials**
V. A. Borodin ..... 1887

**Topographic effect of the misfit dislocation dissociation in threefold symmetry epitaxial systems**
R. Bonnet ..... 1909

**The calculation of the crack-opening volumes of circular and nearly circular tensile cracks via the stress intensity factor**
M. Rahman ..... 1923

**A decagonal quasicrystal with a Griffith crack**
X.-F. Li, T.-Y. Fan and Y.-F. Sun ..... 1943

**Interatomic potential fitted for lead**
D. Y. Sun, Y. Xiang and X. G. Gong ..... 1953

**Superordering in Ni-rich and Ni-poor decagonal Al–Co–Ni phases**
K. Hradil, E. Weidner, R. B. Neder, F. Frey and B. Grushko ..... 1963

**An *in-situ* study of ordinary dislocation glide in γ-TiAl alloys**
A. Couret ..... 1977

**Perfect and partial Frank–Read sources in silicon: a simulation**
A. Moulin, M. Condat and L. P. Kubin ..... 1995

**Ferromagnetism and structural distortions induced in atomized Fe–Al (35–42 at.% Al) powder particles by cold milling**
M. Fujii, K. Saito, K. Wakayama, M. Kawasaki, T. Yoshioka, T. Isshiki, K. Nishio and M. Shiojiri ..... 2013

**Nanometre fcc clusters versus bulk bcc alloy: the structure of Cu–Pd catalysts**
V. Shah and L. Yang ..... 2025

NUMBER 9—SEPTEMBER

**The heat of transport of vacancies in model fcc solids**
C. Jones, P. J. Grout and A. B. Lidiard ..... 2051

**The structure of a grain boundary in a Zr–2.5 wt% Nb alloy**
G. C. Weatherly, A. Perovic and V. Perovic ..... 2071

**High-resolution transmission electron microscopy imaging of misfit-dislocation networks at Cu–MgO and Cu–MnO interfaces**
H. B. Groen, B. J. Kooi, W. P. Vellinga and J. Th. M. De Hosson ..... 2083

**Extrapolation techniques at short gauge lengths based on the weakest link concept for fibres exhibiting multiple failure modes**
P. Zinck, M. F. Pays, R. Rezakhanlou and J. F. Gerard ..... 2103

**Friction mechanism of dislocation motion in icosahedral Al–Pd–Mn quasicrystals**
U. Messerschmidt, M. Bartsch, M. Feuerbacher, B. Geyer and K. Urban ..... 2123

**Diffusion in the B20-type phase FeSi**
M. Salamon and H. Mehrer ..... 2137

**Bonding mechanisms in γ-TiAl: comparison between absorption near edge fine structures and theoretical predictions**
T. Sikora, M. Jaouen and G. Hug ..... 2157

**Experimental evidence for a mechanical function of the cellulose microfibril angle in wood cell walls**
A. Reiterer, H. Lichtenegger, S. Tschegg and P. Fratzl ..... 2173

**The mechanism of low frequency internal friction in concentrated Cu–Al and Cu–Zn alloys**
Q. P. Kong and K. Lücke ..... 2185

**Microstructural investigation of the brittle-to-ductile transition in Al–Pd–Mn quasicrystals**
M. Wollgarten, H. Saka and A. Inoue ..... 2195

**Oxygen in Ti–(Cr, Mn)–Si icosahedral phases and approximants**
J. L. Libbert, J. Y. Kim and K. F. Kelton ..... 2209

**Strain-amplitude-dependent mechanical loss at intermediate temperatures in a $Ni_3$(Al, Ta) single crystal**
B. L. Cheng, E. Carreño-Morelli, N. Baluc, J. Bonneville and R. Schaller ..... 2227

**Antisite-assisted diffusion in the $L1_2$ ordered structure studied by Monte Carlo simulations**
M. Athènes and P. Bellon ..... 2243

**Vacancy loops and stacking-fault tetrahedra in copper. I. Structure and properties studied by pair and many-body potentials**
Yu. N. Osetsky, A. Serra, M. Victoria, S. I. Golubov and V. Priego ..... 2259

**Vacancy loops and stacking-fault tetrahedra in copper. II. Growth, shrinkage, interactions with point defects and thermal stability**
Yu. N. Osetsky, A. Serra, M. Victoria, S. I. Golubov and V. Priego ..... 2285

NUMBER 10—OCTOBER

**Continuum mechanics characterization of plastic deformation-induced oxide film rupture**
D. G. Kolman and J. R. Scully ..... 2313

**Introduction of a scalable three-dimensional cellular automaton with a probabilistic switching rule for the discrete mesoscale simulation of recrystallization phenomena**
D. Raabe ..... 2339

**Pseudoelasticity in $Fe_3Al$ single crystals**
E. Langmaack and E. Nembach ..... 2359

**Structural properties of coated nanoparticles: the CdS/ZnS nanostructure**
L. Audinet, C. Ricolleau, M. Gandais, T. Gacoin, J. P. Boilot and P. A. Buffat ..... 2379

**Self-immobilization of superdislocations in $L1_2$ alloys: a simple statistical analysis**
D. C. Chrzan, M. D. Uchic and W. D. Nix ..... 2397

**Electron diffraction study on the long-range-ordered metastable Fe–Nd–B phase**
T. J. Konno, M. Uehara, S. Hirosawa, K. Sumiyama and K. Suzuki ... 2413

**The thick yield surface: idea and approach for investigating its structure**
Y. E. Beygelzimer and A. V. Spuskanyuk ..... 2437

**Analysis of misfit relaxation in heteroepitaxial $BaTiO_3$ thin films**
T. Suzuki, Y. Nishi and M. Fujimoto ..... 2461

**Low-temperature dynamic precipitation in a supersaturated Al–Zn–Mg alloy and related strain hardening**
A. Deschamps, M. Niewczas, F. Bley, Y. Brechet, J. D. Embury, L. Le Sinq, F. Livet and J. P. Simon ..... 2485

**A self-consistent model for polycrystals undergoing simultaneous irradiation and thermal creep**
P. A. Turner, C. N. Tomé, N. Christodoulou and C. H. Woo ..... 2505

**Optimizing the ALCHEMI technique**
N. Jiang, D. H. Hou, I. P. Jones and H. L. Fraser ..... 2525

**Chemical analysis of grain boundaries using intense electron beams**
P. Shang, R. Keyse, I. P. Jones and R. E. Smallman ..... 2539

**A high-resolution electron microscopy study of steps on lamellar $\gamma$–$\alpha_2$ interfaces in a low-misfit TiAl-based alloy**
P. Shang, T. T. Cheng and M. Aindow ..... 2553

**Amorphous-to-nanocrystalline transformation kinetics in $SbO_x$ films**
T. Missana, C. N. Afonso, A. K. Petford-Long and R. C. Doole ..... 2577

NUMBER 11—NOVEMBER

**Dynamic friction stresses in the γ phase of a nickel-based superalloy**
M. Jouiad, F. Pettinari, N. Clément and A. Coujou ..... 2591

**Morphological evolution of coherent $Ti_{11}Ni_{14}$ precipitates under inhomogeneous stresses**
D. Y. Li ..... 2603

**Crystallization of amorphous $Si_{0.5}Ge_{0.5}$ films studied by means of *in-situ* X-ray diffraction and *in-situ* transmission electron microscopy**
F. Edelman, T. Raz, Y. Komem, P. Zaumseil, H.-J. Osten and M. Capitan ..... 2617

**The Peierls energy revisited**
G. Schoeck ..... 2629

**Plastic deformation of GaAs at low temperatures**
T. Suzuki, T. Yasutomi, T. Tokuoka and I. Yonenaga ..... 2637

***In-situ* transmission electron microscopy study of the dislocation accommodation in [101] tilt grain boundaries in nickel bicrystals**
S. Poulat, B. Décamps and L. Priester ..... 2655

**Tracer diffusion via bound vacancy pairs in mixed ionic crystals**
I. V. Belova and G. E. Murch ..... 2681

**Direct synthesis of $II_3$–$V_2$ compound semiconductors by the heterovalent exchange reaction**
A. C. Wright, T.-L. Ng and N. Maung ..... 2691

**Experimental and theoretical study of misfit dislocation development in low-mismatched heterostructures: application to GaAs/Ge**
M. Putero, N. Burle and B. Pichaud ..... 2711

**Crystal structure determination of an Al–Fe–Si–Be phase by convergent-beam electron diffraction**
J. G. Zheng, R. Vincent and J. W. Steeds ..... 2725

**Self-diffusion in high-angle fcc metal grain boundaries by molecular dynamics simulation**
P. Keblinski, D. Wolf, S. R. Phillpot and H. Gleiter ..... 2735

**Local atomic order in icosahedral Ti–Zr–Ni and hydrogenated Ti–Zr–Ni quasicrystals**
A. Sadoc, J. Y. Kim and K. F. Kelton ..... 2763

**The Avrami–Johnson–Mehl model, heterogeneous nucleation and ion-irradiation-induced phase changes**
G. Carter ..... 2773

**Copper diffusion in dislocation-rich gallium arsenide**
H. S. Leipner, R. F. Scholz, F. Syrowatka, J. Schreiber and P. Werner ..... 2785

**Atomic transport coefficients in a binary random alloy**
S. Sharma, R. Singh and D. K. Chaturvedi ..... 2803

**The plasticity of icosahedral quasicrystals**
P. Guyot and G. Canova ..... 2815

**Structural phase transition in Al–Cu–Mg–Si alloys by transmission electron microscopy study on an Al–4 wt% Cu–1 wt% Mg–Ag alloy reinforced by SiC particles**
C. Cayron, L. Sagalowicz, O. Beffort and P. A. Buffat ..... 2833

**Basal glide of dislocations in ice observed by synchrotron radiation topography**
Y. Okada, T. Hondoh and S. Mae ..... 2853

**Crystalline properties of strontium barium niobate thin films produced by pulsed-laser deposition**
J. G. Zhu, S. K. Singh, P. A. Thomas and S. B. Palmer ..... 2869

NUMBER 12—DECEMBER

**Theoretical study of the internal friction associated with bulk diffusion of solute atoms around dislocations in Al–Mg alloys**
Q. F. Fang and R. Wang ..... 2877

**Iron oxide on (001) MgO**
M. T. Johnson, J. R. Michael, S. R. Gilliss and C. B. Carter ..... 2887

**The $\{10\bar{1}0\}$ inversion domains in GaN/sapphire layers: an electron microscopy analysis of the atomic structure of the boundaries**
V. Potin, G. Nouet and P. Ruterana ..... 2899

**Clusters obtained by sputter deposition of cobalt atoms on alumina**
J.-L. Maurice, J. Briático, J. Carrey, F. Petroff, L. F. Schelp and A. Vaurès ..... 2921

***In situ* transmission electron microscopy observations of dislocation processes in $\delta'$-strengthened aluminum–lithium alloys**
H. Rösner, W. Liu and E. Nembach ..... 2935

**Predicting sublattice occupancy in ternary intermetallic compounds: an analytical approach**
N. Jiang ..... 2953

**Superlattice dislocations in Ti-rich polysynthetically twinned crystals of TiAl**
Y. Liu, D. Lin, Z. Liu and Z. Wang ..... 2965

**The effect of the indenter load on the nanohardness of ductile metals: an experimental study on polycrystalline work-hardened and annealed oxygen-free copper**
Y. Y. Lim and M. M. Chaudhri....2979

**Subject index**....3001

**Index of authors (with titles of papers)**....3007
